

Revolution System

European cylinder

European cylinder Revolution System

OPERATION

- Smaller, lighter key than in traditional bitted key systems.
- Revolution is fitted with a special, effort-reducing gear mechanism which ensures smooth key rotation when operating the lock.
- Revolution has been specially designed to enable the fitting of additional locking points without impairing the smoothness of operation.

SECURITY

Security is guaranteed by the CISA European profile cylinders, true technological jewels.

- The Revolution System, installed with the CISA cylinders AP3 and/or RS3, and series 06480 and/or 06485 protective roses, meets the top security requirements provided for by the European standards EN 1303 and UNI EN 12209:03.

AVAILABLE MODELS

- With and without latch-bolt, with electrically operated latch-bolt, with front locking or three locking points.

- Double lock version (Multifunction Cylinder/Cylinder): 2 locks, coupled to obtain a single product carrying out different types of function for enhanced handiness and security.

RANGE

Developed according to 2 dimensional standards to meet any installation requirements.

CERTIFICATES

All Revolution locks have been designed and tested to meet the strictest requirements provided for by the Draft European Standard UNI EN 12209:03.

**Technical features:**

- Steel case and cover.
- Nickel-plated steel faceplate (mortice locks).
- Nickel-plated steel deadbolts.
- Non-handed nickel-plated latch-bolt.
- Anti-picking latch-bolt (electrically operated locks).
- Nickel-plated reloading pin (electrically operated locks).
- Coil set with built-in terminal block, 12 V, 15 W ac (electrically operated locks).
- Anti-crush plates for screw fixing.
- Steel active pins.
- Effort reducing gears operated by the key turnin in the cylinder.
- Packaging: 1 or 5 pieces (industrial packs).

Operation:

- From the inside: the latch-bolt can be remotely controlled (electrically controlled locks) or key- or handle-operated; the dead-bolts are key-operated.
- From the outside: the latch-bolt and dead-bolts are operated with the key.

Finishes:

- Zinc plated aluminium.

R./L. Hand Opening:

0 = non-handed.

On request:

- European profile cylinder.
- Cylinder protective roses series 06460; 06480; 06485.
- Electric contacts item 1.06510.0.
- Striking plate item 1.06220.20.0.
- Inside escutcheons item 06473.
