double-bitted key rekeyable locks

# New Cambio Facile System double-bitted key rekeyable locks

## OPERATION

- If keys are lost, or whenever keys must be temporarily left with other people you are unsure you can trust, the lock key bitting can be changed at any time.
- The keys can be changed easily, without having to disassemble the lock or parts of it, and for an unlimited number of times.

## SECURITY

- The double-bit key operates the 6 anti-friction levers arranged in 2 sets, separated by the deadbolt tang, each lever being activated by an independent helical spring.
- Coupled with special manganese steel guard assembly plates (item 1.06429.50.0) the New Cambio Facile System is rated a top security product by the European Standard UNI EN 12209:03.

## AVAILABLE MODELS

With and without latch-bolt, with electrically operated latch-bolt, with front locking or three locking points.

- Double lock version (Multifunction New Cambio Facile/cylinder): 2 locks, coupled to obtain a single product performing different functions for enhanced handiness and security.

## RANGE

Developed according to 2 dimensional standards to meet any installation requirements.

## CERTIFICATES

All New Cambio Facile locks have been designed and tested to meet the strictest requirements provided for by the Draft European Standard UNI EN 12209:03.
